EDUCATION

Computer Science BSc (Hons)

King's College London

2021 - 2024

Awards

- Associate of King's College London (AKC)
- Professional Skills for a Globalised World

CS50 Online

Harvard University

2022

A-Levels

Mathematics, Computer Science
Physics, Economics

Leyton VI Form College

2019 - 2021

SKILLS

- Python
- Java
- HTML/ XML/ CSS
- Javascript
- PHP
- C/ C++
- C#
- Scala
- SQL

AWARDS

- Forage JPMC & Co Software Engineering Virtual Experience
- Duke of Edinburgh Bronze & Silver
- OFQUAL Open Awards Entry 3 Award in Employability and Professional Development (RQF)
- OpenLearn Introduction to software development & Technological innovation: a resource-based view

CV made using HTML & CSS

PROFILE

Software Engineer with experience developing and maintaining large-scale systems in high-complexity environments. Strong background in full-stack engineering and data science using tools including Python, Java, SQL and React, alongside practical exploratory experience in machine learning. Proven ability to deliver reliable, well-tested solutions in enterprise and academic settings.

WORK EXPERIENCE

Software Engineer

JPMorganChase

Software Engineer II (Associate) — January 2026 - Current
Software Engineer I (Analyst) — September 2024 - January 2026
Fullstack Development & Data Science

- CIB - Athena Core Devtools
- Python (Pandas | Bottle | Tornado) | Typescript (React) | SQL
- Contributed to a 50M+ line enterprise codebase

Graduate Teaching Assistant

King's College London — September 2023 - August 2024

- Module: 5CCS2PEP Practical Experiences of Programming
- Taught C++ and Scala

Software Engineer Intern

JPMorgan Chase & co. — June 2023 - August 2023

Backend Development & Data Science

- CIB - Athena Market Data
- Python (Pandas) | SQL
- Contributed to a 50M+ line enterprise codebase

Location Camp Manager

Funtech — July 2022 - August 2022

- Managed and supported staff across 7 on-site locations
- Courses: 3D Game Development(Unreal Engine 4), CyberSecurity(Kali Linux), Python(Basic/OOP/Pygame Development/AIML), Lego Robotics, Java(Basic)

PROJECTS

Deafblind Social Media Application

JPMorgan Code For Good Hackathon - NGO: DeafBlind UK
Group Project - 5 Contributors

- Python | SQL - Social Media Web App (Flask | ColorBlind | PIL | CV2 | DeepFace)
- Social Media website designed for deafblind people
- Key Features: Facial Recognition Login, Google Sign-in, Image Colour Daltonization, Text to Speech, Image Magnification

Greggor Financial Companion

Group Project - 8 Contributors

- Python | Javascript - Financial Tracker Web App (Django | PIL | Tabula | Pandas | Numpy)
- Financial tracker web application, enabling users to track expenditures across multiple banks, categories and currencies
- Key Features: Parsing Transactions from Bank Statement, Account Balance Projections, Finding Subscriptions, Financial Quiz

Phase Folding Kepler Exoplanet Luminosity

- Python | Data Analysis & Graphical Manipulation (Pandas | Numpy | Matplotlib)
- Calculating the radius and orbital period of an exoplanet from the change in luminosity of the star it's orbiting using phase folding.
